

CUTTER NOT CUTTING EVENLY

FOR ALL PROCUT
SYSTEMS

1-1

- ◆ Uneven cutting by the cutter is defined as cutting correctly in one area of the vinyl but cutting too deep or too shallow in another area across the width of the cutter.
- ◆ This issue may occur on any of the ProCut systems.

1-2

- ◆ When this issue occurs, first, inspect the teflon cutting strip below the cutter blade all across the length of the cutter.

Cutting Strip

Cutting Strip

1-3

- ◆ The cutting strip should be smooth without any damage.
- ◆ See cutting strip cross sections

- ◆ CR Series

- ◆ Contour / Servo

1-4

- ◆ If the teflon cutting strip has been cut by the cutting blade it is likely that the strip will need to be replaced.

- ◆ CR Series

- ◆ Contour / Servo

1-5

- ◆ With the cutting strip profile displaced, the blade is unsupported and will now penetrate through the vinyl in the damaged area

- ◆ CR Series

- ◆ Contour / Servo

1-6

- ◆ It is possible to temporarily fix this condition by using a flat tool to push the displacement flat again

- ◆ CR Series

- ◆ Contour / Servo

1-7

- ◆ Although this repair should produce acceptable results we recommend replacing the cutting strip.

- ◆ CR Series

- ◆ Contour / Servo

1-8

- ◆ A special condition of uneven cutting is cutting normal on both left and right ends and shallow in the center with the cutting strip undamaged.
- ◆ If this occurs, the cutting mat may need to be shimmed. Contact Cutterpros for assistance with cutting mat shimming.
