

MONDO RAXX JUMBO

— Large Format Media Storage —

MJ Series Instructions

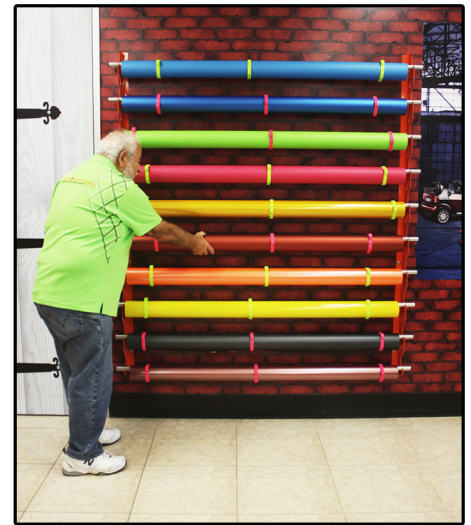

Mounts to any surface with proper hardware.

Kit Includes: 2 - 71" Long Struts. 1 left side - 1 right side

Mounting Hardware and Poles NOT included poles can be purchased at Home Depot - Lowes - Large Hardware Stores Industrial Supply Stores, etc. Can use 1" Diameter Pipe, Conduit - PVC - Wood Dowel - Aluminum Tubing, etc. (your choice)

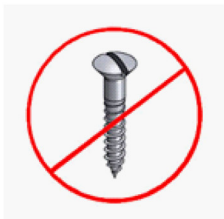

Determine the location where rack will be installed and surface to determine the mounting hardware to be used. Note the strength and usefulness of this rack will be determined by the proper mounting hardware used for your particular wall.

Use only high quality and correct mounting hardware.

- 1 Locate the first rack side. Using a level to mark the location of the holes, make sure the rack is high enough to accept the bottom roll of material. Mount the strut to the wall with the proper hardware.
- 2 Determine the distance you require between the struts. Add 2" inches to the roll size you are going to store for clearance.
- 3 Locate the second rack side making sure it is level both horizontally and vertically and mark the holes for mounting. Mount the strut to the wall with proper hardware.

- 4 Recommended Mounting Hardware:
 - Drywall 3/8" x 3" Toggle Bolts with flat washer
 - Masonary 3/8" Lag Bolts + Lag Shields
 - Wood Studs 3/8" Lag Bolts Length to be determined on site
