Signcut stuck in Test Mode
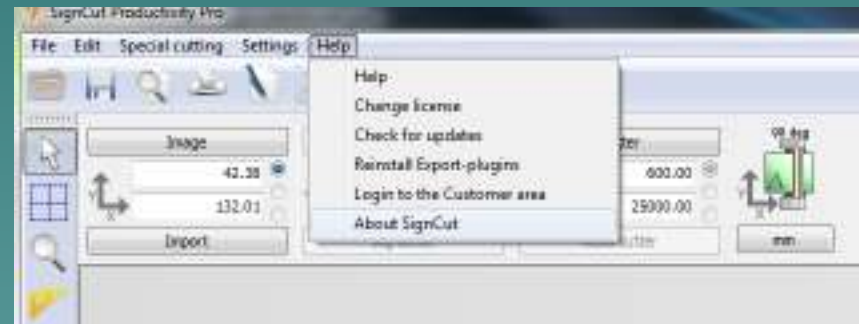

1-1 Expiration Date

◆ Check the expiration date of the program.

◆ To do this, go to the Help menu and click 'About Signcut'.

1-2 Expiration Date

- The license number and expiration date are both listed on this page.

- If the expiration date is earlier than today's date, the program is expired and will need to be renewed.

- If the date listed is December, 1969, verify your computer is connected to the internet and that there are no firewalls or anti-virus programs blocking the connection for Signcut.

CutterPros.com

1-3 Expiration Date

◆ Restart the computer after adding Signcut to the allowed list of the anti-virus software, and/or after disabling the computer's firewall.

◆ If running on a wireless card, be sure to turn it on before running Signcut.

◆ Turn Signcut back on. The Test Mode message should go away.

The End
